Dry Steam Cleaners

Jet steamer 62000 Watt Diesel

The diesel powered Jet steamer is the extension of our professional and industrial program with an extremely high steam production and all the benefits of low-pressure. By means of very high steam temperatures and a patented integrated compressed air system the cleaning power of high-pressure is being matched and is it a real alternative to dry-ice blasting!

This professional dry steam cleaner has been developed for the highest industrial demand and is very suitable for heavy cleaning requirements in almost all industrial field and production. Production machines, robotic systems and other mechanical, electrical, pneumatic and hydraulic installations can be cleaned most quickly, environmentally friendly and effective. Machine revisions, cleaning and maintenance jobs can be done on the spot thanks to the very low water consumption. Costly dismantling and interruption of production processes are no longer necessary. The high working pressure of this dry steamer assures cost- and timesaving.

The powerful diesel operated dry steam cleaner has the top quality level in steam technique. The machine contains the highest standard of components, has a strong bodywork with stainless steel, air wheels, advanced electronics and very practical features like an automatic water filling system. Above all the patented compressed air system is very worthwhile. This integrated system with the possibility to combine compressed air with steam is a revolutionary cleaning method. This concept with steam, compressed air and detergent is in many cases a very low-cost alternative for dry-ice blasting. There is simply no alternative for this machine.

Advantages

- An effective addition to your machine park
- Quick and easy cleaning in case of maintenance work
- An even better cleaning result with our special detergents and the unique compressed air
- Low water usage of 1 litre per minute against a ten to twenty fold amount in high pressure cleaners. As a result environmentally friendly and therefore less disposal costs
- Disinfectant effect
- High steam temperature of 185°C
- Directly connectable to your water supply
- Maintenance friendly autonomous diesel operated
- Steam, compressed air and detergent directly controlled with the pistol at safe low voltage

Technical details

Heating capacity	62.000 Watt
Voltage	230 V or 400 V
Maximum steam pressure	16 bar
System temperature dry steam	185°C
System temperature wet steam	145°C
Water consumption	1,0 – 2,7 l/min
Water consumption dry steam	1,0 l/min
Water consumption wet steam	2,7 l/min
Cleansing time	continuously
Detergent pump	optional
Compressed air intermixture	0,5 - 10 bar
Compressed air requirement	0,25 – 0,3 m ³ / min
Compressed air pressure min	6 bar
Length steam hose	10 m
Capacity fuel tank	20 l
Fuel consumption per hour	6 l
Anti scale system	integrated
Water connection	standard ¾"
Pressure water supply	2,0 - 4,0 bar
Wheels	pneumatic tyres 260 x 85
Dimensions (L x B x H) (mm)	1100 x 740 x 770
Weight	145 kg

The Jetsteamer is available as 230 V or 400 V version.
