

Wigrex

Dry Steam Cleaners

Join Super Steam 3400 / 6000 Watt

Our low-pressure steam equipment cleans perfectly and knows endless applications. This professional, industrial steam technique lends itself extremely well to intensive cleaning of persistent or ill reachable contaminations. The professional user can choose between a number of 230V and 400V machines from the high-quality Join Super Steam series. High-grade materials and years of development created a reliable, user-friendly and effective steamer.

The innovative models from the Join Super Steam series stand for quality. The strong stainless steel bodywork, advanced electronics and other high-grade materials show that this series is designed for the professional and industrial market. The modern techniques and the power of steam will make you clean without effort. The steam, detergent injection or vacuum cleaner can be operated easily from the steampistol.

An extensive set of brushes and accessories comes with every machine and provides a very extensive and efficient application for this machine. All machines are equipped with an adjustable detergent injection. With the optional, powerful and integrated dust- and water vacuum cleaner, its functionality can be increased even more.

If necessary the environment-friendly Wigrex products can be used to quickly remove persistent greases, oil, chewing gum, paraffin, lime, moulds, oxidations, sugar remains, chocolate remains, graffiti, stickers, etc. Furthermore, steam cleaners consume a minimal amount of water, contradictory to high-pressure cleaners that easily make a wet affair. Therefore, steam cleaning is often used in the food industry with its strict HACCP norms!

Advantages

- Multi-purpose cleaner
- Quick and easy cleaning in case of maintenance work
- Low water usage. As a result environmentally friendly and therefore less disposal costs
- Strong stainless steel bodywork
- Modern electronic control
- Stainless steel boiler with high-quality heating elements
- Heating elements welded into the boiler to prevent leakage through gaskets or seals
- Adjustable system for the injection of detergents
- Steam, detergent and vacuum cleaner directly controlled on the pistol at safe, low voltage
- Disinfectant effect
- An even better cleaning result with our special detergents

Technical details

Model	3400 SC/V	6000 SC/V
Voltage	230V	400V
Capacity	3400 Watt	6000 Watt
Steam pressure	6,5 bar	7 bar
System temperature	165°C	170°C
Cleansing time	continuously	continuously
Detergent pump	yes	yes
Capacity water tank	5 liters	5 liters
Capacity detergent tank	2 liters	2 liters
Steam outlet	adjustable	adjustable
Vacuum cleaner	optional	optional
Boiler	stainless steel	stainless steel

Models

The Join Super Steam SCV is technically identical to the SC model but is equipped with a powerful integrated vacuum cleaner. The 400V machines are even more powerful than the 230V models and maintain a constant high pressure and temperature.

Cleansing agents

For optimal results, we advise to use our cleansing agents because other cleansing agents settle or loose their effectiveness when heated! Furthermore, our cleansing agents are biodegradable and not aromatic, so there is no bad smell or irritation from heating.
